### *Hanami*: A Flowering Celebration!

The beginning of spring (March-April) is a very special time in Japan because this is when Japan's famous cherry trees come into flower. The Japanese celebrate this happy time with festivals and flower-viewing parties.

At the end of winter, everyone's excitement starts to grow. The whole country wants to know the exact day when the cherry flowers ('sakura') will appear. Starting in February weathermen try to guess when this day will be.

When the first flowers open on the trees, national joy breaks out! There are rides and games for children in the street, music and dance performances, tea ceremonies, flower displays, and much more. But the most special thing that people do at this time is have 'hanami' parties. *Hanami* means flower watching. In a *hanami* party, families and friends take a picnic and go and sit under a cherry tree to look at and admire the flowers. *Hanami* parties take place during the daytime and also at night, because when it is dark, lights light up the cherry trees.

*Hanami* is very important to the Japanese. Cherry blossoms appear on trees for only one week before they fall to the ground and die, and for the Japanese this symbolises the short nature of childhood and life. So *hanami* is a time when Japanese people like to think about how important life is.

- 41 Spring is the Japanese people's favourite time of year.
- 42 It is not easy to know the day the cherry flowers will open.
- 43 *Hanami* takes place a week after the cherry trees blossom.
- 44 The cherry flowers do not stay on the trees for very long.
- 45 When the cherry flowers appear, people hope for long lives.

## Reading

G Read the text and match the phrases (A-F) to the gaps (41-45). There is one extra phrase.

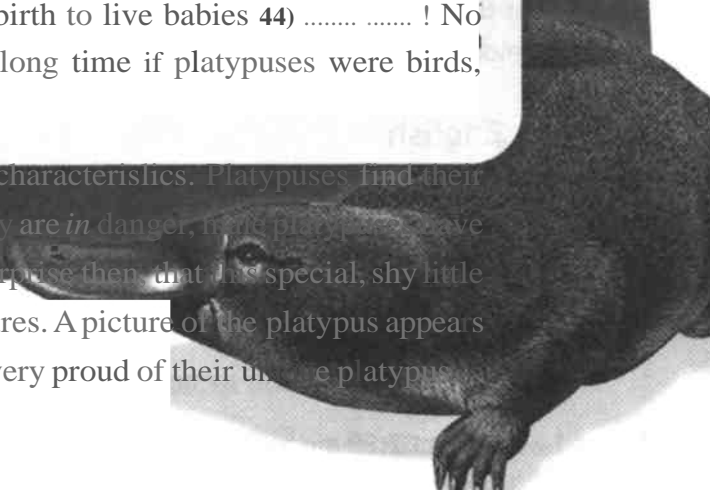

### Nature's joke? - the strange and wonderful

The platypus is a strange little creature found only in Australia. When the first platypus was sent to Europe in the 19th century, the scientists who examined it just could not believe their eyes. They believed the platypus was a joke, **41)** ..... They thought some fun-loving Australian had put the feet and nose of a duck onto the body of a rat, **42)**

.....!

But platypuses *are* real, **43)** ..... Platypuses have a nose like a duck, webbed feet like a duck, soft brown fur on their body and a long, flat tail like a beaver. As if that weren't strange enough, even though they are mammals (which means they feed their babies milk), platypuses don't give birth to live babies **44)** ..... ! No wonder scientists couldn't decide for a very long time if platypuses were birds, reptiles or mammals.

But the platypus has even more wonderful characteristics. Platypuses find their food in rivers by using electric fields. And, if they are *in* danger, male platypuses have sharp hooks on their feet **45)** ..... It's no surprise then, that this special, shy little animal is one of Australia's most famous creatures. A picture of the platypus appears on the Australian 20 cent coin. Australians are very proud of their unique platypus.

- A but instead lay eggs just like birds
- 8 because of its extremely strange appearance
- C that produce poison strong enough to kill adog D just to play a trick on them
- E and there is no other creature like them on Earth
